## **General Notes**

### Notes on the documentation

This description is only intended for the use of trained specialists in control and automation engineering who are familiar with the applicable national standards. It is essential that the following notes and explanations are followed when installing and commissioning these components.

### Liability conditions

The responsible staff must ensure that the application or use of the products described satisfy all the requirements for safety, including all the relevant laws, regulations, guidelines and standards.

The documentation has been prepared with care. The products described are, however, constantly under development. For this reason, the documentation may not always be have been fully checked for consistency with the performance data, standards or other characteristics described. None of the statements in this manual represent a guarantee for as set out in § 443 of the German Civil Code or a statement about the assumed use according to the contract as set out in § 434 para. 1 clause 1 no. 1 of the German Civil Code. In the event that it contains technical or editorial errors, we retain the right to make alterations at any time and without warning. No claims for the modification of products that have already been supplied may be made on the basis of the data, diagrams and descriptions in this documentation.

© This documentation is protected by copyright. Any reproduction or third party use of this publication, whether in whole or in part, without the written permission of Beckhoff Automation GmbH, is forbidden.

### **Description of safety symbols**

The following safety symbols are used in this operating manual. They are intended to alert the reader to the associated safety instructions.

This symbol is intended to highlight risks for the life or health of personnel.

**Warning** 

This symbol is intended to highlight risks for equipment, materials or the environment.

This symbol indicates information that contributes to better understanding.

#### **Basic safety measures**

The wall mounting frame may only be used in conjunction with the designated Beckhoff Control Panel.

Before installing and removing the Control Panel, all system components must be switched off, and the Control Panel must be uncoupled from the system.

Disconnect the device by unplugging the connectors on the Control Panel side.

System components that have been switched off must be secured against being switched on again.

### **Operator's obligation to exercise diligence**

Only qualified personnel may install the Control Panel in the wall mounting frame.

The operator must ensure that only appropriately trained electricians deal with installation and wiring of the Control Panel.

# After installation check the Control Panel for secure fastening in the frame.

Ensure that inadvertent detachment of the Control Panel from the wall mounting frame is prevented.

# Installation instructions

### Appropriate use

The C9900 wall mounting frame is designed for Beckhoff Control Panels. For possible frame and panel combinations please refer to section *Frame sizes and descriptions*.

The stainless steel mounting frame can be flush-mounted in a solid wall or screw-mounted in a dry wall.

### Frame sizes and descriptions

Frame descriptions

The following frames are available for the different panel sizes:

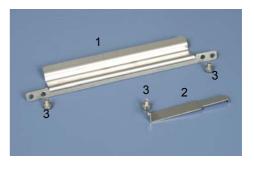

- C9900-M298 panel mounting frame for CP6608
- C9900-M311 panel mounting frame for CP6609/CP6909
- C9900-M313 panel mounting frame for CP6601/CP6901
- C9900-M314 panel mounting frame for CP6602/CP6902
- C9900-M316 panel mounting frame for CP6603/CP6903

### Scope of supply

Scope of supply

The following components are included:

- 1 panel mounting frame (not shown),
- 1 mounting bracket (1) and
- 1 fastening bracket (2) for attaching to the Control Panel,
- 4 bolts M4x5 (3) for fastening the two brackets.

i <sub>Note</sub>

Only 3 bolts are required for mounting the CP6608 Control Panel (see top diagram).

### Mounting

#### Mounting of the wall mounting frame

Once the required opening has been prepared (see section *Assembly dimensions*), the mounting frame can be installed in the wall. The frame design allows for air circulation as required.

**I I Note** Ensure that the wall mounting frame is oriented correctly. The preassembled fastening magnets must be positioned at the top of the frame (see image below).

dry wall

#### Attaching the brackets to the Control Panel

In order to be able to fasten the Control Panel in the wall mounting frame, the fastening bracket and the mounting bracket first have to be attached to the Panel. Proceed as follows:

Attaching the fastening bracket

Remove the clamping lever located at the top in the center of the Control Panel using a 2.5 mm Alleen key. For a CP6608 Panel remove the top left or right clamping lever.

Attach the fastening bracket in place of the clamping lever using the M4 x 5 mm screw provided as shown.

Mounting - CP6608 shown as example

When removing the clamping levers prevent the Control Panel from disintegrating while the bolts are removed.

Attaching the mounting bracket

Then remove the three lower clamping levers (two levers for CP6608).

Attach the mounting bracket in place of the clamping lever using the remaining M4 x 5 mm bolts as shown.

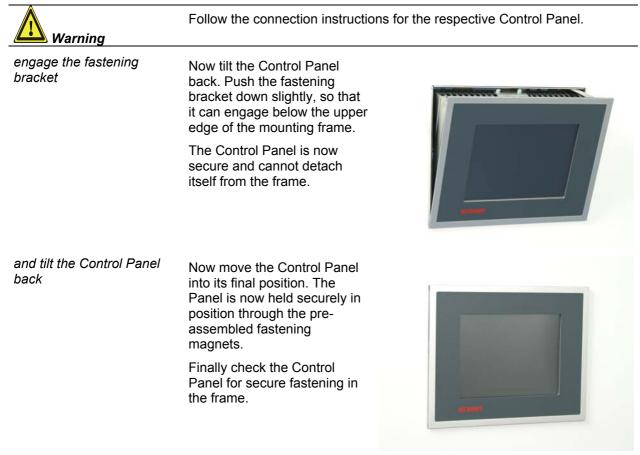

#### **Inserting the Control Panel**

Once the wall mounting frame is installed in the wall and the brackets are attached to the Control Panel, the Control Panel can be inserted in the frame:

Position the Control Panel, First position the Control Panel with the mounting bracket on the lower edge of the mounting frame.

Now connect all electrical connections at the rear of the Control Panel.

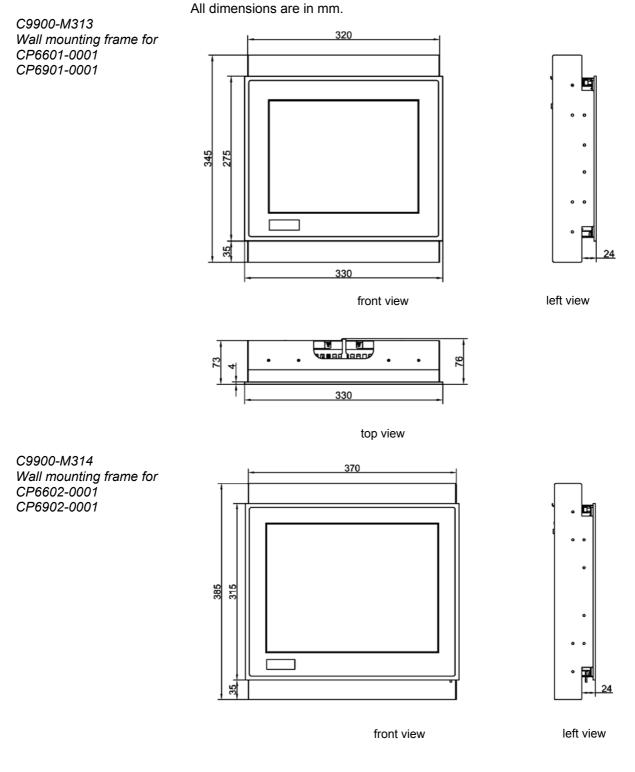

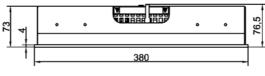

### **Dismounting the Control Panel**

Dismounting in reverse<br/>orderDismounting the Control Panels occurs in reverse order:1.Grasp carefully behind the upper edge of the Panel in order to

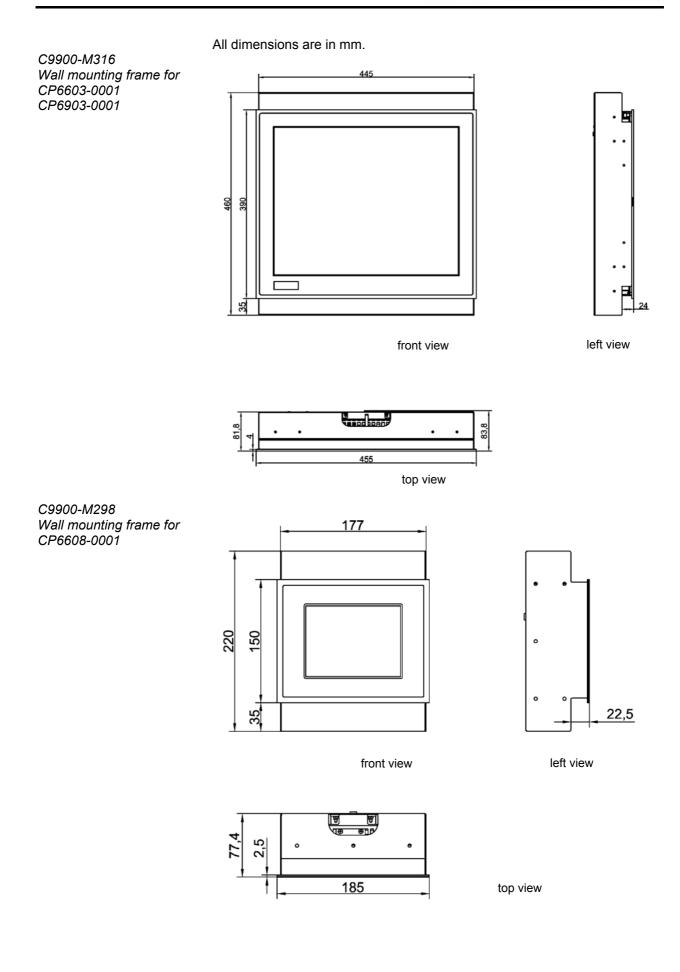

- solve the chassis of the fastening magnets.
   Swivel out the Panel so far as the fastening bracket allows.
- 3. Push down the fastening bracket a bit in order to swivel out the Panel completely.
- 4. Disconnect all connections to the Panel.
- 5. Take out the Control Panel from the wall mounting frame carefully and put it down on a clean, soft base.

#### **Beckhoff Support & Service**

Beckhoff and their partners around the world offer comprehensive support and service, guaranteeing fast and competent assistance with all questions related to Beckhoff products and system solutions.

#### Beckhoff branches and partner companies

Please contact your Beckhoff branch office or partner company for <u>local</u> <u>support and service</u> on Beckhoff products!

The contact addresses for your country can be found in the list of Beckhoff branches and partner companies: <u>www.beckhoff.com</u>

You will also find further documentation for Beckhoff components there.

#### **Beckhoff Headquarters**

Beckhoff Automation GmbH Eiserstraße 5 33415 Verl Germany

Phone:	+49(0)5246/963-0
Fax:	+49(0)5246/963-198
e-mail:	info@beckhoff.com

#### **Beckhoff Support**

Beckhoff offers you comprehensive technical assistance, helping you not only with the application of individual Beckhoff products, but also with wideranging services:

- worldwide support
- design, programming and commissioning of complex automation systems
- training program for Beckhoff system components

 Hotline:
 +49(0)5246/963-157

 Fax:
 +49(0)5246/963-9157

 e-mail:
 support@beckhoff.com

#### **Beckhoff Service**

The Beckhoff service center supports you in all matters of after-sales service:

- on-site service
- repair service
- spare parts service
- hotline service

Hotline: +49(0)5246/963-460 Fax: +49(0)5246/963-479 e-mail: service@beckhoff.com

Quote the project number

If servicing is required, please quote the **project number** of your product.
